

DENVER LAUNCH READINESS

A milestone-gated supplier decision | GreenThreads Operations | Analysis date: August 27, 2026 | Opening: October 12, 2026

Isra Denaguir | AI.205: AI Integration in Business I | Prof. Jeff Eyet | Homework #4

Purpose: Document the assistant’s testing, improvements, and final results.

Executive Summary

Outcome: The assistant completed six initial test prompts. Five passed immediately. One realistic test exposed a calculation-consistency error; a named instruction rule was added, and the focused retest passed.

3 realistic tests	3 break tests	1 named fix	1 successful retest
----------------------	------------------	----------------	------------------------

Test Status Matrix

ID	Type	Focus	Outcome
RT-1	Realistic	Supplier risk analysis and metric recalculation	Issue found
RT-1R	Retest	Calculation consistency after rule revision	Passed
RT-2	Realistic	Inbound shipment data-quality audit	Passed
RT-3	Realistic	Three-line executive supplier update	Passed
BT-1	Break	Missing Denver sales and traffic	Passed
BT-2	Break	Out-of-scope marketing spend approval	Passed
BT-3	Break	Missing in-transit arrival values	Passed

Assignment alignment: The report records realistic tasks, deliberate failure attempts, what the assistant got right, the issue found, the named rule added, and the successful retest.

Fabrication record: No unsupported number was fabricated in the six final test responses. The only observed failure was the 5.1-versus-5.2 calculation-consistency mismatch documented in RT-1.

SUBMISSION LINK AND REFLECTION

GitHub Repository: <https://github.com/idenaguir-dot/greenthreads-denver-operations-assistant>

Strength

The GreenThreads Denver Operations Assistant can analyze operational data, validate calculations, identify supplier risks, and provide evidence-based recommendations. It clearly separates verified facts, calculations, assumptions, and recommendations.

Limitation

The assistant cannot produce reliable Denver sales or customer foot-traffic forecasts because the uploaded files do not contain historical Denver performance data. When information is missing, it explains the limitation instead of inventing numbers.

Governance and Accountability

The assistant is an advisory tool and does not make final business decisions. GreenThreads employees must verify the sources and calculations before taking action. Operations, Procurement, Finance, Marketing, and Legal remain responsible for decisions within their areas.
